<p>Data</p> <p>Your data is critical, client and supplier records, accounts, mail, products, contracts and so on. How long could you continue if you lost it?</p>	<p>Security</p> <p>Make sure your crucial data is ONLY available the right people. Review current virus threats and perimeter protection.</p>	<p>Duplication</p> <p>Enable quick recovery of lost files, accidental deletions and other data loss problems.</p>	<p>Offsite backup</p> <p>Recover from a total disaster like a fire, flood or equipment theft.</p>
<p>Communications</p> <p>Email should be an efficiency revolution in your business not a headache</p>	<p>Email security</p> <p>Individual accounts, virus and spyware scanning, develop your email policy and prevent misuse.</p>	<p>SPAM</p> <p>Unwanted mail can be reduced or even eliminated with hosted filtering techniques.</p>	<p>Advanced Mail hosting</p> <p>Multiple email accounts, forwarders, webmail, antispam, shared calendars, mobile phone compatibility.</p>
<p>Software</p> <p>Your software represents a major investment which should be looked after.</p>	<p>Updates</p> <p>Keeping up to date is vital, service packs, patches, signatures and new releases need constant attention.</p>	<p>Alternatives</p> <p>The biggest brand names might not be the best value.</p>	<p>Lease Finance</p> <p>Computer hardware and software can be leased. This highly tax efficient method of finance can bring forward important IT investment, enable upgrading during the finance period and help you to budget for the long term.</p>
<p>Hardware</p> <p>Properly maintained computers can last for years. A servicing regime can save money in downtime and replacement costs.</p>	<p>Maintenance schedules</p> <p>Some of the tasks that keep your computers in good order can be automated.</p>	<p>Failure warnings</p> <p>Computers and some related equipment can self diagnose and warn you in advance of trouble.</p>	<p>Lease Finance</p> <p>Computer hardware and software can be leased. This highly tax efficient method of finance can bring forward important IT investment, enable upgrading during the finance period and help you to budget for the long term.</p>
<p>Support</p> <p>Who do you call when there is a problem? Ideally somebody who knows your IT system and understands your business priorities.</p>	<p>Remote support</p> <p>Collaborative help to deal with a software query or we can securely take over a PC to solve a problem or reconfigure it.</p>	<p>On site support</p> <p>If it can't be done by remote then we'll be there as quick as the issue demands.</p>	<p>Control costs</p> <p>Choice of tariffs to suit your business. From a pay as you go service to our full System Manager tariff with fixed monthly cost for easy budgeting.</p>
<p>Innovation</p> <p>Information technology constantly changes and it is good to rethink the way things are done from time to time, these are just a few typical current examples.</p>	<p>Remote access</p> <p>Working from home sometimes can be the answer to childcare, staff retention, and even reduce overheads.</p> <p>e-commerce</p> <p>Growth of on line sales is still increasing even in difficult trading condition, are you getting your share?</p>	<p>Mobile working</p> <p>With broadband on your laptop you could be out of the office and still completely in touch</p> <p>Sharepoint</p> <p>Share information in collaborative groups within your business and with clients, suppliers and partners.</p>	<p>Reduce paper and postage</p> <p>PDF documents, paperless invoicing or e-billing can have a big impact on office running costs.</p> <p>Do you need a server?</p> <p>Hosted file sharing, online mail server, e-commerce, remote access. The expense of maintaining your own server could be unnecessary.</p>
